## Experience

SEPT. 2021 – PRESENT

**SOFTWARE ENGINEER | MAKESTORIES.IO**

- At MakeStories.io, I led the development of a robust analytics module using RabbitMQ, ClickHouse, and MongoDB for real-time data processing, scaling it further with AWS services like Athena and S3 for enhanced flexibility and performance. I also implemented Apache Kafka and ksqldb for real-time analytics and data resilience. In addition to handling technical work, I oversaw the migration of over 50 Laravel APIs to NestJS, optimized infrastructure with Docker, and developed the Story Assistant module with the ChatGPT API. I took charge of project management, coordinating cross-functional teams to ensure timely delivery of features. I also played a key role in the development of MakeForms, a highly customizable form-building platform, and built a custom CMS using Next.js, Redis, and Strapi with custom plugins for audit logs and image cropping.

MAY 2019 – SEPT. 2021

**FULL STACK DEVELOPER | IAUDITED**

- At iAudited, I served as a Full Stack Developer, leading the development of Layered Process Audit (LPA) software to improve product quality. I built a web application using Laravel, HTML, Bootstrap, and JavaScript for audit data processing and visualization. The system featured AI-driven audits, digital checklists, and offline capabilities. Additionally, I integrated Azure Active Directory for Single Sign-On (SSO), enhancing security and user authentication. I also implemented advanced data security measures, ensuring compliance with industry standards.

FEB. 2018 – MAY 2019

**FULL STACK DEVELOPER | SPRYOX**

- At SpryOX, I worked as a Full Stack Developer, building over 10 full-stack web applications using PHP, Laravel, MySQL, React, Node.js, and JavaScript. I integrated REST and SOAP APIs for Google Maps, social media logins, and payment processors, contributing across all stages of the Software Development Life Cycle (SDLC) to deliver client-focused solutions efficiently.

## Skills

Node.js, NestJS, Express, PHP, Laravel, MySQL, MongoDB, Redis, Apache Kafka, ClickHouse, ksqldb, AWS, Google Cloud, Docker, Kubernetes, React, Next.js, HTML, CSS, JavaScript, REST APIs, WebSocket, SSO (Azure AD), CI/CD, Project Management

## Education

DEC. 2027

**Bachelor of Computer Application | Amity University**
