🖥 sid-bgk.stellaraxon.tech

Dedicated and efficient software engineer with 4+ years of experience building applications with a variety of tools, languages, and frameworks. Excels in learning new technologies and applying them to develop clean and well-structured code. Experienced at working on projects at all stages of the Software Development Life Cycle (SDLC) from idea to development to delivering the completed product

EXPERIENCE

Sept. 2021 - Present

SOFTWARE ENGINEER – MAKE.IO

Make.io, currently known as makestories.io is a product based company. We currently have two products MakeStories and MakeForms. MakeStories provide a simple platform to create a web story for Instagram, Google webstories, etc where web stories are supported. MakeForms is like Google forms but better with around 40+ customisation and template options.

For MakeStories I was responsible for migrating Laravel (php) api to nestjs, migrated around 50+ APIs. Later I developed 2 individual modules.

For MakeForms handled setup, deployment and integration of elasticsearch. Created api related to form responses for ag-grid which is advance high performace react table. Handled various integration from google sheet to Mailchimp.

Major accomplishments:

- Created analytics module from scratch which measured story views, page views and click data.
- Successfully capturing 300+ requests per second with robust architecture.
- Used various technologies like RabbitMQ, Filesystem, Nodejs, Google cloud functions, MongoBD and clickhouse to capture requests with minimum or no data loss.
- Designed AWS Athena, MongoBD, clickhouse and redis architecture for fast data retrieval. Scanning more than billion records within few seconds.
- Created Assisted Story Helper module which converts Website into story.
- Implemented Elasticserch services for maintaining replica of database, which is further used to retrieve count or data as needed at much faster speed.
- Integrated Google sheet and other mailing technology which sent data to there respective sheet or mailing agent.

SKILLS

Skill	Level
Node	● ● ● ● ●
NestJs	● ● ● ● ●
AWS	● ● ● ● ○
React	● ● ● ● ○
Express	● ● ● ● ●
MySQL	● ● ● ● ○
MongoDb	● ● ● ● ○
HTML	● ● ● ○ ○
CSS	● ● ● ● ○
PHP	● ● ● ● ○
Laravel	● ● ● ● ●

Other technologies

- Redis
- Clickhouse
- AWS athena
- RabbitMQ
- Linux
- Google Cloud Functions
- Elasticsearch

Education

- **BCA,** Amrita Vishwa Vidyapeetham (2nd Year)
- **HSC,** The Divine Image Collage, Mumbai.
- **SSC,** Inner Wheel School, Ambernath

- Handled team of 4 while developing modules for MakeForms

May 2019 - Sept. 2021

PROJECT MANAGER - IAUDITED

iAudited is a Layered Process Audit (LPA) software, a tool for the consistent implementation of process standards to improve product quality. As project manager my responsibilities was planning, procurement and execution of new Features.

Major accomplishments:

- Developed full-stack web application which processed, analyzed, and rendered data visually.
- Managed time-sensitive updates, including content changes and database upgrades.
- Planned, wrote, and debugged application features with complete accuracy.
- Successfully integrate Azure Active Directory, to implement Single Sign-On feature.
- 90% of features were completed ahead of schedule.

Feb. 2018 - May 2019

FULL STACK DEVELOPER – SPRYOX

SpryOX was a service based Website and Mobile app development company. I joined as PHP developer. As my HTML5 and CSS3 skills improved, I worked as full stack developer.

Major accomplishments:

- Developed app integration with REST / SOAP and other APIs for Google Maps, social media logins, payment processors, and other services
- Develop 10+ full-stack web applications to analyze and process data for different clients
- Played a key role in the development, improvement, and operation of web-based software
- Gained hands-on expertise in PHP, Laravel, MySql, HTML, CSS, Javascirpt and exposure to front end libraries such as JQuery and React

Jun. 2017 - Jan. 2018

ANDROID DEVELOPER – KICK TECH SMART

Kick tech smart was mobile application development company. I started my developer journey from this company as Android Developer.

Major accomplishments:

- Developed Android Modules for KickApp written in Java:
  - Browser
  - Wifi File Transfer
  - Gallery
- Developed Messaging and Notification modules for KickApp written in Nodejs using Firebase and Google Cloud Services
- Designed and Developed SpalonA Employee and Customer app and wrote REST API for the same
